PROFILE SUMMARY

Hello! I'm Amaan Sodagar, and I'm passionate about front-end & back-end development. I have a strong desire to work for a reputed company where my skills will be recognized and utilized effectively.

I am dedicated to my work and committed to acquiring knowledge, expertise, and familiarity with the organization's culture.

WORK EXPERIENCE

V Ex Tech Solution   Jan - May (2024)
Full Stack Developer Intern

- As a Full Stack Web Developer, I played a key role in building an e-commerce website. Developed a responsive and dynamic web application using the MERN stack. Implemented secure user authentication to enhance data protection and user privacy. Design and implemented user interface with React.js. Created RESTful APIs with Express.js to manage user data , orders and other functionalities , ensuring seamless communication between the frontend and backend.

PROJECTS

Real Time Chat Application ↗

- Developed a fully functional real-time chat application using the MERN stack, featuring a responsive user interface built with React.js and modern UI libraries. Implemented secure authentication with JWT and designed RESTful APIs to manage core functionalities, including user data and real-time message history. Integrated Socket.IO for seamless, bi-directional communication and optimized MongoDB for scalable and efficient storage of user and chat data, ensuring a smooth and interactive user experience.

Scan Application

- For university project created flutter based application that scan the barcode of the products and add products in cart for purchases.

Personal Asistant

- For university project in diploma created a basic android based personal assistant which can search using voice commands , make phone calls and open applications in mobiles.
